

NCTRC® Exam Reference List

Individuals wishing to become certified through the National Council for Therapeutic Recreation Certification® (NCTRC) and earn the Certified Therapeutic Recreation Specialist® (CTRS®) credential must meet specific educational and professional experience requirements, in addition to passing the NCTRC Certification Exam.

The following list includes the major therapeutic recreation literature that was available as reference material during the development of the exam items for the current NCTRC Certification Exam.

NCTRC does not wish to give the impression that these resources are definitive sources for test item development. The resources were used as supportive documentation and reference materials that commonly held practice knowledge. Therefore, please note that NCTRC does not endorse any of these documents. Nor are these references comprehensive. Rather, they are provided as illustrative materials referenced in the exam development process and NCTRC recognizes other worthwhile references exist.
